Writing Unit: Essay (Informational)

Stage 1: Determine the Desired Results

Enduring Understanding(s):

Good writers develop and refine their ideas for thinking, learning, communicating and aesthetic expression.

Informational text is organized by topic and supporting details.

When writing to explain or offer information, writers need to know the specific text patterns or forms of organization.

Researchers gather and critique information from different sources for specific purposes.

Rules and conventions of language help readers understand what is being communicated.

Essential Question(s):

How do writers express themselves? How does the process shape a writers product?

How do writers organize informational text?

Where do writers go for valid facts to back up their ideas and how do they include this information in their writing?

Why conduct research?

How do rules of language affect communication?

Common Core Standards:

Students will be able to:

Stage 3: Learning Plan

The Components of a Minilesson

A writing minilesson is a short lesson focused on a specific principle or procedure (Calkins 1986, 1994). A minilesson's components are: Connection, Teaching, Active Engagement, and Link. Each minilesson follows the same architecture:

Connection: Children learn why today's instruction is important and how it relates to the prior work. They hear the teaching point that crystallizes the lesson.

Teaching: The teacher shows children how writers go about doing whatever is being taught. Usually this involves a demonstration, which the teacher sets up and explains.

Active Engagement: Children are given a chance to practice (for a minute) what has just been taught. The teacher scaffolds their work so they can be successful.

Link: The teacher crystallizes what has been taught, adding it to children's growing repertoire. Children are reminded that today's lesson pertains not only to today, but to every day. The teacher often summarizes the conditions under which a child is able to reach for this new knowledge.

The Architecture of a Conference

Each conference is unique; however, they nevertheless do have a predictable structure.

Research: Observe and interview to understand what the child is trying to do as a writer. Probe to glean more about the child's intentions. Name what the child has already accomplished as a writer and remind the child to do this in future writing.

Decide: Weigh whether you want to accept or alter the child's current plans and processes. Decide what you will teach and how you will teach it. Although there may be several teaching decisions, think about the one teaching point that is apt to make the biggest difference in the child's writing. Plan the way in

which you will provide the student with guided practice.

Teach: Instruct the child on critical writing strategies, i.e., adding details, creating a more effective hook, removing information that does not support the topic, or selecting a topic that the child may not know.

Link: Name what the child has accomplished as a writer and remind the child to do this often in the future.
