

HYGIENIC MANAGEMENT

The Board of Education recognizes that the health and physical well-being of the pupils and staff of this district depend in large measure upon the cleanliness and sanitary management of the schools.

The Board directs that a program of hygienic management be instituted in the schools and explained annually to all staff members. Each school shall be inspected for cleanliness and sanitation by the school nurse, not less than once each year.

The Board will cooperate with the local board of health in the sanitary inspection of the schools' toilets, washrooms, food vending machines, water supply, and sewage disposal systems.

The Superintendent shall prepare, in consultation with the school medical inspector, procedures to be followed in the handling and disposal of blood and body fluids, whether or not pupils or staff members with HIV infection are present. School staff members and volunteers shall be provided the supplies for implementing the procedures. In particular, school nurses, custodians and teachers shall be trained in proper handling procedures.

The Superintendent shall develop and supervise a program for the cleanliness and sanitary management of the school buildings, school grounds, and school equipment pursuant to statute, rules of the State Board of Education, and regulations of the State Board of Health.

The day-to-day cleanliness of each school building shall be the responsibility of the principal.
