

POLICY

TRANSPORTATION OF HANDICAPPED PUPILS

The Board of Education shall provide transportation services for educationally handicapped pupils as required by law and dictated by the pupil's educational needs and physical welfare.

The Board will provide the transportation specified as a related service in the program of special education approved for an educationally handicapped pupil. Such transportation will conform to the pupil's individualized education program (IEP) and the transportation requirements described by the child study team or prescribed by the school physician. Transportation may include such special equipment, services of aides, and arrangements for the pupil's mobility within the school building as will assure the pupil's safety and protection from harm.

The transportation of educationally handicapped pupils to special education programs approved by this Board of Education and located outside the state will conform to guidelines established by the New Jersey State Department of Education. Such transportation services will be dictated by the pupil's IEP and approved by the child study team. The individual plan for a handicapped pupil's out-of-state transportation will be submitted to the Office of the County Superintendent prior to its implementation. In general, transportation of out-of-state handicapped pupils will be by the most economical and expeditious mode consistent with the pupil's special needs-and will be limited to travel at the beginning and the ending of the school year.

State aid will be sought for the services provided in accordance with law and this policy. The Board directs that appropriate records be maintained and all relevant documentation be preserved in order that the district be properly reimbursed for the costs of transportation for the handicapped.
